Date _____

Dear Primary Care Provider,

Your patient, _____, was hospitalized recently.

During this hospitalization during a routine risk assessment performed on all patients seen in the facility for care, it was discovered that your patient has risk factors for obstructive sleep apnea (OSA) Undiagnosed OSA is known to increase morbidity.. This notification is part of the OSA protocol to increase monitoring during the hospitalization as well as communicate the positive screen to the primary care physician for further evaluation as indicated.

In the interests of promoting comprehensive patient care, if Centura sleep services can be of further assistance please do not hesitate to contact us at:

- St. Anthony Central Hospital
